Air-Q and Solaga: healthy air in the home office

Class 8 alumni air-Q has developed a smart device for monitoring air quality, and notifying you of potential harmful impurities in your air. Meanwhile class 9 alumni Solaga has developed a picture frame containing natural algae, which can actively clean the air in your space.

solaga

The **combination of both innovations delivers better air quality indoors.**

- [Solaga](#) 

Keleya: Pregnancy App

Not only do you have to keep yourself and others safe, you have to ensure the well-being of that baby developing inside your body.

Class 6 alumni Keleya is a Berlin-based startup that has developed an app to help coach you through the phases of pregnancy.

Mementor: sleep better in sleepless times

In these sleepless times, it is important to ensure that our immune system works optimally. A good night's sleep is a key prerequisite for this. mementor has developed an online training developed by sleep researchers that helps to cope with sleep disorders: A clinical study shows that problems with falling asleep and staying asleep can be successfully treated with the digital application.

Tex-lock: bicycle lock made of high-tech fibers

tex—lock

Class 4 Alumni Tex-lock has developed a bicycle lock made of high-tech fibers. The ART 2 security certified lock carries many obvious advantages: soft surfaces protect the bicycle frame, and the high flexibility allows secure connections to solid objects.

Tex-lock bicycle locks are manufactured in Leipzig, and the company is one of the few startups with a female founding team.

Vizzlo: The graph to communicate every idea from the homeoffice

Vizzlo is a class 3 alumni that has developed a SaaS product to help create beautiful graphics and charts, in much less time than traditional products such as PowerPoint.

We don't know how long we're going to be in this mess. From the simplest pie chart to complex data visualizations, Vizzlo has the graph to communicate every idea from the Homeoffice.
