HEALTH MADE IN GERMANY. Guide to Contract Research in Germany

Oct 07, 2013

The guide contains brief profiles of the contract research providers, including graphics to tell users which stages of drug discovery research are covered by the individual company. Moreover, a tabular overview correlates companies with technologies and services provided: among these are synthesis, screening, medical chemistry, cell culture technology, bioanalytics and clinical research.

The directory has been published under the auspices of Health - Made in Germany, the Export Initiative for the German Health Care Industry. Aid in compiling entries was provided by the Biotechnologie-Industrie-Organisation Deutschland, BIO Deutschland, the German Association of Biotechnology Industries (DIB), and the Association of German Biotechnology Companies (VBU).

Pages : 76

Subjects : Medical Biotechnology
Pharmaceuticals
