

INVITATION

GTAI-PROGRAM @WORLD HYDROGEN SUMMIT 2026

VISIT US
@GERMAN
PAVILION
HALL 2
BOOTH 2E90

Meet Germany Trade & Invest's industry experts at World Hydrogen Summit 2026 to find out more about a carbon-neutral energy future using hydrogen in Germany, available business opportunities, market access and how your company can benefit from a presence in Germany.

Wednesday, May 20

11:30 – 1:30 p.m.

Meeting-Room Dock 10A,
1st floor

Networking Session

Business Opportunities in Germany's Net Zero Valley: Rheinisches Revier

For Dutch companies and international investors, this is a concrete, near-term opportunity - on your doorstep. Bringing together policymakers, project developers, and entrepreneurs already operating on the ground, this event is designed to connect decision-makers with the people shaping this transition.

2:00-3:00 p.m.

H2 Tech Insights Stage,
Hall 5

German Session

From Pipe to Power: Building a Hydrogen Ready Energy System in Germany

This session brings together key infrastructure stakeholders to explore pathways toward a hydrogen ready energy system in Germany. It offers a system wide perspective spanning transmission and distribution networks, import infrastructure, and hydrogen ready power generation. It will examine how regulation translates into real world project implementation, linking backbone pipelines, distribution networks, import corridors, and hydrogen ready generation capacity into a coherent system view.

The discussion will address the technical, economic, and systemic requirements for scaling hydrogen infrastructure, drawing on practical project experience and highlighting current bottlenecks. A central focus will be the regulatory and political framework shaping infrastructure development, including recent legislative and policy instruments influencing network planning, asset conversion, and investment decisions.

Thursday, May 21

11:00-11:40 a.m.
German Pavillon

German Session
Become Part of Germany's H₂ Industry:
Market Overview, Company Setup, Regulation, Incentives and Case Study

Explore Germany's energy future driven by hydrogen. Experts from Germany Trade & Invest provide an overview of the German H₂ market. The session will include key trends, the regulatory and tax environment, available incentives, and how to establish a business presence in Germany. A hydrogen expert from EnBW will give practical insights into their projects in the German hydrogen industry.
